

AutoMatik

Customer Portal API - Test Guide

Base URL: `http://localhost:5000/portal`

Auth: Flask session cookie from POST `/auth/login`

Role required for all routes: customer

Test credentials: `cust_juan / customer123`

Table of Contents

1. GET `/portal/`
2. GET `/portal/inquiries`
3. POST `/portal/inquiries`
4. GET `/portal/inquiries/{id}`
5. GET `/portal/warranty-claims`
6. POST `/portal/warranty-claims`
7. GET `/portal/warranty-claims/{id}`
8. GET `/portal/sales`
9. GET `/portal/sales/{id}`
10. GET `/portal/profile`
11. PUT `/portal/profile`
12. GET `/portal/vehicles`
13. GET `/portal/vehicles/{id}`
14. GET `/portal/documents`
15. GET `/portal/documents/{id}`
16. PUT `/portal/notifications/{id}/read`

Route 1: GET /portal/

Customer dashboard with counts

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 2: GET /portal/inquiries

List customer's inquiries

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 3: POST /portal/inquiries

Create a new inquiry

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 400: missing vehicle_id or message
- 422: message exceeds 1000 characters

Route 4: GET /portal/inquiries/{id}

Get inquiry detail

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 5: GET /portal/warranty-claims

List customer's warranty claims

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 6: POST /portal/warranty-claims

Create a warranty claim

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 400: missing sale_id, vehicle_id, claim_type, or description
- 422: invalid claim_type (must be repair/replacement/refund)
- 422: description exceeds 2000 chars
- 404: sale not found or does not belong to customer

Route 7: GET /portal/warranty-claims/{id}

Get claim detail

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 8: GET /portal/sales

List customer's sales

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 9: GET /portal/sales/{id}

Get sale detail

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 10: GET /portal/profile

Get customer profile

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 11: PUT /portal/profile

Update customer profile

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns success (profile updated)

Route 12: GET /portal/vehicles

Browse available vehicles

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 13: GET /portal/vehicles/{id}

Get vehicle detail

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 14: GET /portal/documents

List vehicle documents

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 15: GET /portal/documents/{id}

Get document detail

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 200: returns data (empty array if none)
- 404: specific record not found (detail endpoints)

Route 16: PUT /portal/notifications/{id}/read

Mark notification as read

Authentication & Authorization

- Requires logged_in_required (valid Flask session)
- Requires role_required('customer')
- Non-customer roles (admin, agent) receive 403

Error Cases

- 404: notification not found

Appendix: Setup & Prerequisites

Session Authentication

Before testing these routes, log in via POST /auth/login:

```
curl -X POST http://localhost:5000/auth/login \
  -H "Content-Type: application/json" \
  -d '{"username": "cust_juan", "password": "customer123"}' \
  -c cookies.txt
```

Use sessions cookie

Append -b cookies.txt to subsequent curl requests.

Verifying Side Effects

- Database: SELECT * FROM notifications WHERE user_id = ...
- SocketIO: Listen to 'notification' events on user_{id} / role_{role} rooms
- Email: Check Flask-Mail log / mailtrap.io if configured

Test Customer Credentials

cust_juan	/ customer123	Has inquiry about Vios XLE
cust_luisa	/ customer123	Has inquiry about Civic RS
cust_carlos	/ customer123	Has sale + warranty claim on Fortuner GR
cust_angela	/ customer123	Fresh account, no inquiries or claims
